

## ESMART<sup>®</sup> DATA CAPTURE

REMOVE COST FROM YOUR BUSINESS

BEC provides data capture solutions that increase productivity, business transaction accuracy and ultimately, improves bottom line profits. The eSmart<sup>®</sup> data capture suite consists of a number of data capture modules designed to automate a variety of business processes. The modules can be used independently or together to provide real time, accurate data, resulting in slicker processes and smoother operations throughout your business. BEC offers the complete package from planning to completion, including hardware, RF or wired infrastructure, software and support. With BEC's expertise you get seamless integration of the eSmart<sup>®</sup> data capture solution into your existing business system and benefit from a strong return on investment.

### eSmart<sup>®</sup> SFDC

BEC's shop floor data capture solutions provide your business with the hardware and software tools you need to gather essential data from the factory floor quickly, efficiently and accurately.

### e smart DATA CAPTURE

*Modular data capture suite tailored to your business needs.*

*Accurate management information and increased efficiency.*

*Automate data capture and eliminate human error.*

*Remove duplication of effort, drive cost savings in admin, auditing and labour activities.*

*Complete traceability of products and operations, from goods in through to final delivery.*

*Optimise the use of assets, plant and workforce.*

From work in progress (WIP) to time and attendance, eSmart® SFDC gives you real time, accurate information at any given moment.

## eSmart® Voice

Voice directed technology provides hands free, eyes free and paperless advantages. With voice recognition and speech synthesis, you can verify and instruct in real time, improve accuracy, customer satisfaction and overall productivity.

## eSmart® Automation

Automating your processes removes human error and accelerates your production line, saving money. The eSmart® Automation system provides enhanced packaging conformance, improved production line throughput and reduced staffing costs. It works with robotics, vision and conveyor systems to name a few.

## eSmart® Tracker

Whether you have trucks, trailers, heavy plant, food products or reusable containers, the eSmart® Tracker solution allows you to track, trace, protect, maintain and optimise the utilisation of your assets.

## eSmart® Warehouse

BEC's eSmart® Warehouse solution drives down costs and optimises the efficiency of your warehouse. It streamlines operations and provides full visibility of your stock and pick performance in real-time. With accurate

201-M02

and reliable stock records, your warehouse or distribution centre can reduce wastage and improve customer satisfaction.

## eSmart® Out Of Premise

Wherever your field personnel are and whatever they do, you can reduce paperwork, expedite invoicing and improve customer satisfaction. BEC's eSmart® Out of Premise provides accurate real-time information about job progress and enables more efficient planning. The solution is easily customisable for all your electronic proof of delivery, asset management, van sales or field service needs.

## eSmart® Console.

BEC's eSmart® Console provides a real time window into your business processes, giving you an instant snapshot of operational and employee efficiencies. Arriving 'out of the box' with a range of standard dashboards and reports, the console is easily tailored to provide 'role specific' screens. Your team can then view business critical information in a format that suits them. The console also supports automatic alarm triggers, alerting supervisory staff when key performance indicators fall below the expected levels
